

Thesis – will need a more descriptive title!

Master's Thesis

Stefano Mezzini

April 2023

Contents

1	Introduction	1
2	Methods	1
3	Environmental stochasticity map	1
4	Movement analysis	2
5	Synthesis chapter	2

1 Introduction

- spend time reading papers initially to do a review, get a review paper out of it
- make predictions/hypotheses for project
- what influences stochasticity: what is it and what is affecting it
- very little testing has been done on effects of stochasticity

2 Methods

3 Environmental stochasticity map

- currently don't have a raster of stochasticity => paper / product
- PCA on main drivers/causes of stochasticity

4 Movement analysis

- add HFI to analysis

5 Synthesis chapter
